About SmartPOS

The SmartPOS is efficient and secure and allows you receive from all payment sources such as cards (MasterCard, Visa & GhLink) and Mobile Money services to carry out basic financial transactions including purchase of payments and cash withdrawal (cash back / cash advance).

Timeline for Implementation

Deployment of POS terminals to your company takes a maximum of 48hours from the time you submit all documentations required.

Documentation Required:

1. All registration documents certified and issued by the Registrar General's Office.
2. Settlement bank details.
3. Tax and identification number (TIN)
4. Merchant application form

Online Dashboard Reconciliation

PaySwitch company will provide a Dashboard to your Company so that you can have access to viewing transactions online real-time on the POS device. You will be able to access reconcilliation reports within a period of time.

Security

Our POS terminals are hand-held and android powered, enabled with a stylish design for counter-top and mobile used. They are equipped with the highest security to meet the latest hardware and software security requirements, respectively; EMV level certifications and PCI compliance. The application that runs our POS terminal is developed such that it acquires all card schemes approved by BoG and is enabled to acquire contactless payments, QR payments and NFC payment options too.

Benefits of SmartPOS

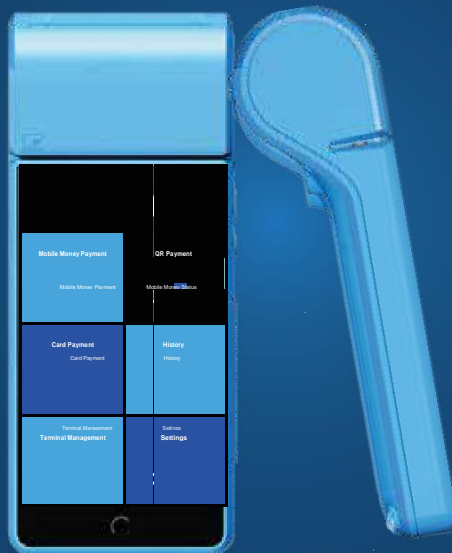

- Clear and rapid account reconciliation.
- Negligible fraud as payments are validated through a secured path.
- Lower transactional costs compared with cheque, cash processing and cash collections.
- Dashboard to view real time transactions.
- Highly satisfied customers with no additional cost to them.
- Country wide footprint of 'payment' points at outlets.
- Your SmartPOS terminal is equipped with the highest security to meet the latest software security requirements, respectively; EMV level certifications and PCI compliance.
